

## ASTRO LOO-LIFT

Just place the Loo Lift over the toilet and you are ready to go! Powered by a rechargeable battery, the Loo Lift is easy to clean, and with a weight capacity of 170kg it will suit most users and bathrooms.

The Loo Lift is height adjustable so fits over a wide range of toilet sizes. There is further, finer adjustment in the feet which can be individually shortened or lengthened if there is an uneven floor.

### **Limited Mobility:**

If you have limited mobility or struggle with sitting and rising when using the toilet, a LooLift can provide the support you need to make this task easier and safer. It also provides added stability and security for those at risk of falling.

### **Chronic Pain or Arthritis:**

Those that suffer from conditions such as arthritis or chronic pain may find using the toilet painful and difficult. A LooLift can help to reduce stress on the joints and alleviate discomfort.
